

Understanding Lean Thinking

Overview

'Lean Thinking' is the name commonly given to the tools and techniques derived from the Toyota Production system. Since the publication of the bestselling book by Womack and Jones in 1999 an increasing number of 'non production' organisations have explored its application as a way of enhancing effectiveness and efficiency. This workshop will introduce participants to the core elements of 'Lean Thinking' and then explore its application within their agency. At the conclusion of this workshop participants will have a series of practical actions they can directly apply when they return to work.

Content

Topics to be covered include:

- The history and evolution of Lean.
- Lean into action.
- The value of flow.
- Designing the system from the customer.

Outcomes

By the end of this course you will be able to:

- Understand the system you work in.
- Identify factors that are preventing flow.
- Value the importance of de-cluttering.
- Uncover hidden savings by doing less and achieving more.

Who should attend?

This workshop will be of greatest benefit for those who are trying to do more with less but a running out of tools.

Benefits to you and your organisation

This workshop should enable you to see the needless complexity within your system and how to reinvigorate the flow. Your agency/department will benefit through your ability to identify new ways of doing things...you may save their bacon!

Pathways:

This course is part of the extended series, **Emerging Executives and Development Series: A Pathway to SAES**. You can register for the entire series and receive a 10% discount or register for individual sessions that meet your needs.
