

On the Couch-The CE Series with Dr Campbell Gemmell

Thursday 23 May 2013

Kuarna Acknowledgment

We would like to acknowledge this land that we meet on today is the traditional land of the Kaurna people and that we respect their spiritual relationship with their country. We also acknowledge the Kaurna people as the custodians of the Adelaide region and that their cultural and heritage beliefs are still as important to the living Kaurna people today.

Master Of Ceremonies – Daniel Butler

The regulator's dilemma....

(Source: Wikimedia Commons

"Regulators, under unprecedented pressure, face a range of demands, often contradictory in nature: be less intrusive – but more effective; be kinder and gentler – but don't let the bastards get away with anything; focus your efforts – but be consistent; process things quicker – and be more careful next time; deal with important issues – but do not stray outside your statutory authority; be more responsive to the regulated community - but do not get captured by industry."

("The Regulatory Craft", 2000 by Professor M K Sparrow of the South Australia's Environment Protection ("Environment Protection of Covernment, Harvard University)

Getting the balance right

Leadership & Management

EPA
South Australia

- Leadership is tough....
- It'll stretch you and test your resilience
- Walk the Talk/Know your stuff!
- Bs recruit Cs; As recruit A+s
- Scenarios; Plan Do Review Lea
- DPSIR model invaluable
- Play to Team Strengths and avoid Group Think
- Servant-Leadership is hard in an Heroic world – Listen!
- Humility isn't dithering...and adr when you are wrong...

 "The very essence of leadership is that you have to have a vision. It's got to be a vision you articulate clearly and forcefully on every occasion. You cannot blow an uncertain trumpet"

Reverend Theodore Hesburgh.

• "The pessimist complains about the wind. The optimist expects the wind to change. The leader adjusts the sails"

John Maxwell.

Known knowns, uniqueness and proportion
