

# MASTERCLASS Research - Policy Partnerships

**Are you a researcher interested in seeing your research translated into policy and practice?**

**Are you a policy professional interested in using evidence to improve your policy making?**

## Learning Objectives

- Examine the value of collaborative partnerships in producing evidence-informed policy
- Explore methods designed to enhance research and knowledge translation
- Clarify different terminologies used in research and policy making endeavors
- Become familiar with the key processes used in research and policy making

## Masterclass Outcomes

- Share experiences with researchers and policy actors in an interactive space
- Develop skills and expertise in collaboration for research-to-policy translation
- Explore opportunities for working across research policy boundaries
- Network and build research and policy partnerships

## Who should attend?

- Researchers/Academics interested in research-to-policy translation
- Policy professionals and government/non-government officials, interested in evidence informed policy

## Course Structure

This is an interactive short course that uses a 'learning by doing' approach. It includes lectures, small group work, self reflection, group discussion, and feedback from participants.
